## NAME

nop – pretty-print graph file

## SYNOPSIS

**nop** [ **−p?** ] [ *files* ]

## DESCRIPTION

**nop** reads a stream of graphs and prints each in pretty-printed (canonical) format on stdout. If no *files* are given, it reads from stdin.

## OPTIONS

The following options are supported:

**−p**       Produce no output - just check the input for valid DOT.

**−?**       Print usage information.

By default, *gc* returns the number of nodes and edges.

## EXIT STATUS

If any errors occurred while processing any input, such as a file not found or a file containing illegal DOT, a non-zero exit value is returned. Otherwhilse, zero is returned.
